

SEXUAL HEALTH LONDON

New contraception service

Including emergency hormonal contraception – available in specified boroughs

SHL offers contraception and emergency contraception to people over the age of 16 who live in **Lambeth, Southwark, Kensington and Chelsea, Hammersmith and Fulham, Westminster, Ealing, Harrow, Hackney, City of London and Brent.**

It's for people who want to start using contraception or continue their current method and would normally get it from their sexual health clinic.

How it works

Register or log in to SHL.uk and choose the contraception service you need. If you need both emergency contraception and regular contraception, choose emergency contraception first.

You'll be asked a few questions about your health and personal circumstances to assess what you might need and whether it's medically suitable for you.

You'll be given a choice of contraceptives to order online. You can also choose to have a pregnancy test and condoms supplied with emergency contraception.

If you choose to order online you will be automatically connected to LloydsPharmacy Online Doctor where you will complete a full consultation which will be reviewed by a clinician.

If the clinician has any questions you will get a message through the portal.

If you're prescribed contraception, you can either pick it up from a LloydsPharmacy branch and some Sainsbury's stores or have it delivered. Emergency contraception is delivered the next day, if delivery is chosen.
